

## Editorial

It is with great pleasure that the Editorial Committee presents its 2nd volume of **Quarks: Brazilian Electronic Journal of Physics, Chemistry and Materials Science (e-ISSN: 2674-9688)** to its readers. Firstly, we are grateful to have the important support and help of the librarian Adriana Aparecida de Oliveira in the new OJS platform. This new platform systematizes our blind evaluation system by peers in addition to facilitating communication with our collaborators.

**Quarks: Brazilian Electronic Journal of Physics, Chemistry and Materials Science** journal reiterates its commitment to the public and quality scientific production policy in the country, the result of a collective, collaborative and participatory work of researchers, professors, reviewers from Brazilian universities that, in an intense work in network, allows the existence of a qualified scientific publication in Brazil. This journal has a dedicated team of professional editors, who are experts in their own fields and interact with the scientific community to identify new trends in research.

The cover of the second volume of the journal was styled by Professor João Paulo Almeida de Mendonça containing in the main image ice crystals formed in environmental conditions and photographed by Professor Virgílio de Carvalho dos Anjos during his postdoctoral internship in Canada. So, we thank Professor Virgílio for the kind sending of these figures.

The editorial committee thanks the authors for their interest in publishing in Quarks journal and we wish you all a fruitful reading.

Valdemir Ludwig
